

SHELL HELIX POWER & PROTECT

FAQs

Why does Shell Helix POWER add power to my car?

Shell Helix POWER has two technologies. First, it is made from pure base oil. Secondly, the pure base oil and special additives control friction so, engine power is not lost due to friction and is delivered unhindered to your car. The pure base oil has been tested on Formula 1 race tracks.

Why does Shell Helix PROTECT revitalize my engine?

As an engine gets old, deposits build-up. These deposits reduce the engine performance. Shell Helix PROTECT can remove old deposits and thus, revitalize your engine.

How are these oils different from Shell Helix Ultra?

Shell Helix Ultra is a top-quality oil and is designed to offer multiple benefits. Shell Helix POWER and Shell Helix PROTECT are also top-quality oils and have been optimized to retain power and revitalize engine. Shell Helix Ultra is a generalist, these oils are specialists.

What makes Shell Helix POWER / PROTECT superior to Shell Helix HX7?

HX7 is synthetic technology oil whereas POWER and PROTECT are full synthetic oils which are optimized to retain power and revive your engine through pure base oil and additives.

What makes Shell Helix POWER / PROTECT so good? Is it suitable for my car?

Shell Helix POWER / PROTECT are our best fully synthetic products with 0W-40 / 0W-30 viscosities with American Petroleum Institute (API SN) specification. They have been approved by European OEMs (BMW, Mercedes, Volkswagen) and meet Japanese and American OEMs specs like Toyota, Honda, General Motors etc. They use technologies that have been tested in F1 by Ferrari, DTM (Deutsche Tourenwagen Masters) race by BMW and WRC (World Rally Championship) by Hyundai. These 0W viscosity oils are compatible with most cars.

How does Shell Helix POWER / PROTECT compare with other oils like Mobil 1 / Castrol Edge?

I cannot comment on specific competitor brands. However, I can assure you that Shell Helix POWER / PROTECT are superior to several synthetic competitor oils.

What is the technology behind Shell Helix POWER / PROTECT?

We use two technologies. First is pure base oil and the second, is a proprietary additive package. The formulations are optimized for power retention and revitalize the engine by removing old deposits.
